

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph no. 43 with the following amended paragraph:

Printing unit 21 is constituted so as to include print engine(s) and engine controller(s).

Printing unit 21 might, for example, create image data for printing in units of bands, prescribed printing being carried out in accordance with specified settings as a result of causing printhead(s) to scan in a paper feed direction and in a direction orthogonal thereto. ~~Controller 23 Storage Unit 22~~—comprising, for example, hard disk drive(s) and/or semiconductor memory device(s)—stores image file(s) and the like acquired from camera 10. User interface 24—comprising, for example, liquid crystal panel(s), operating switch(es), and/or the like—accepts instructions and the like from user(s), and also displays progress of printing and so forth. USB host controller 25 is for carrying out data communication with camera 10 via USB.
